I/We (do)(**do not**) agree with:

☒ [X] The Agency proposed modifications As Submitted on Item No. **DSA AC 02/06 (Part 2 – DOJ)**

and request that this section or reference provision be recommended:

☐ [] Approved ☐ [] Disapproved ☐ [] Held for Further Study ☒ [X] **Approved as Amended**

by the reviewing Code Advisory Committee.

Suggested Revisions to the Text of the Regulations (Revisions Without Regulatory Effect):

- **General.** DSA/AC proposes to update the model code language where required throughout this document to match the current published 2006 International Building Code language.
Reason: Model code language shown in this document was based on draft language made available to the State of California by the International Code Council. The final published model code language contains minor revisions or updates in various locations.
- **Application.** DSA/AC proposes to remove the general application statement, “for applications listed in Section 109.1 regulated by the Division of the State Architect/Access Compliance”, and replace with the DSA/AC acronym, “[For DSA/AC]”, where required throughout this document.
Reason: This change is required for consistency with the Building Standards Commission format.
- **Section 1116B.1.10 - Hall Call Buttons.** DSA/AC proposes to correct a typographical error in the last sentence of this section by inserting an approved 2004 Rulemaking change. Criteria #1 & 8.
Reason: An approved 2004 Rulemaking change was unintentionally omitted during preparation of this document. DSA/AC is proposing to insert the approved change, “*Hall call buttons shall be internally illuminated with a white light over the entire surface of the button,*” as the last sentence of this section.

1116B.1.10 Hall Call Buttons. *The centerline of the hall call buttons shall be 42 inches (1067 mm) above the*

floor. Buttons shall be a minimum of 3/4-inch (19.1mm) in size and shall be raised 1/8 inch (3.2 mm) [plus or minus 1/32 inch (0.8 mm)] above the surrounding surface. The button designating the up direction shall be on top. Visual indication shall be provided to show each call registered and extinguished when answered. Objects adjacent to, and below, hall call buttons shall not project more than 4 inches (102 mm) from the wall. **Hall call buttons shall be internally illuminated with a white light over the entire surface of the button.**

- **Section 1117B.2.7 Enclosures.** DSA/AC proposes to correct a conflict between the code provisions located in this section and the proposed changes to Figure 11B-4.

Reason: In order to comply with the federal ADA Standards, Figure 11B-4 was revised. Associated revisions to this section were inadvertently omitted during preparation of the rulemaking document. Criteria #1.

1117B.2.7 Enclosures. *If telephone enclosures ...*

1. Side reach possible. ~~The overhang shall be no greater than 10 inches (483 mm). The height of the lowest overhanging part shall be equal to or greater than 27 inches (686 mm). Where a parallel approach is provided at a telephone within an enclosure, the enclosure and counter may extend beyond the face of the telephone a maximum of 10 inches (254 mm). The enclosure and counter may not overlap the required clear floor or ground space. See Figure 11B-4 (a).~~

2. Full-height enclosures. *Entrances to full-height enclosures ...*

3. Forward reach required. ~~If the overhang is greater than 12 inches (305 mm), then the clear width of the enclosure shall be 30 inches (762 mm) minimum; if the clear width of the enclosure is less than 30 inches (762 mm), then the height of the lowest overhanging part shall be equal to or greater than 27 inches (686 mm). Where a front approach is provided at a telephone within an enclosure, the counter may extend beyond the face of the telephone a maximum of 20 inches (508 mm) into the required clear floor or ground space and the enclosure may extend beyond the face of the telephone a maximum of 24 inches (610 mm). If an additional 6 inches (152 mm) in width of clear floor space is provided, creating a clear floor space of 36 inches by 48 inches (914 mm by 1219 mm), the enclosure may extend more than 24 inches (610 mm) beyond the face of the telephone. See Figure 11B-4 (e).~~

4. Protruding telephone enclosures. *Where telephone enclosures protrude ...*

- **Section 1134B.1 - Scope.** DSA/AC proposes to correct a typographical error following this section.

Reason: The section title "CHAP. 11B, DIV. IV" should not appear in this location. Criteria #8.

1134B.1 Scope. *The provisions of this division apply to ...*

~~CHAP. 11B, DIV. IV~~

1134B.2 General. *All existing buildings and facilities ...*

- **Section 1134B.2.2 (Accessibility for Existing Buildings).** DSA/AC proposes to correct a typographical error by adding the IBC adoption proposed changes to this section. Criteria #8.

Reason: The IBC adoption proposed changes were omitted in error.

~~**1134B.2.2** Where it is technically infeasible in the area of an alteration to make existing restroom toilet facilities code compliant and to install separate sanitary toilet facilities for each sex, then the installation of at least one unisex toilet/bathroom facility per floor being altered, located in the same area as existing toilet facilities, will be permitted. Such a facility shall meet the requirements of Section 1115B.7.2.~~
